

# Measurement expertise

## The right moisture probe for your application

The measuring principle developed from and for science in the 1970s has been optimized for 40 years by IMKO and has been implemented in robust, reliable and high-resolution products in all industries.

The technology enables us to meet all necessary requirements for the respective applications through adapted sensor geometries.

# Moisture measurement

# Persuasively reliable

## High quality through high standards

Certified according to:

- DIN EN ISO 9001:2015, Quality Management System (QMS)
- DIN EN ISO/IEC 80079-34, QMS for Ex products
- DIN EN ISO 60079-0 und 60079-31, product certification

Before our products leave the factory, there are carefully checked and tested individually.

- Each device individually calibrated
- Serial number managed sensor database
- Continuous improvement

Moisture Sensor Experts

Made in Germany

## Soil

„We offer precise measurements for soils and substrates, even in highly wet conditions“

#soilexperts

## Construction

„The right sensor at every quality point along the concrete production process chain“

#experienceconcretequality

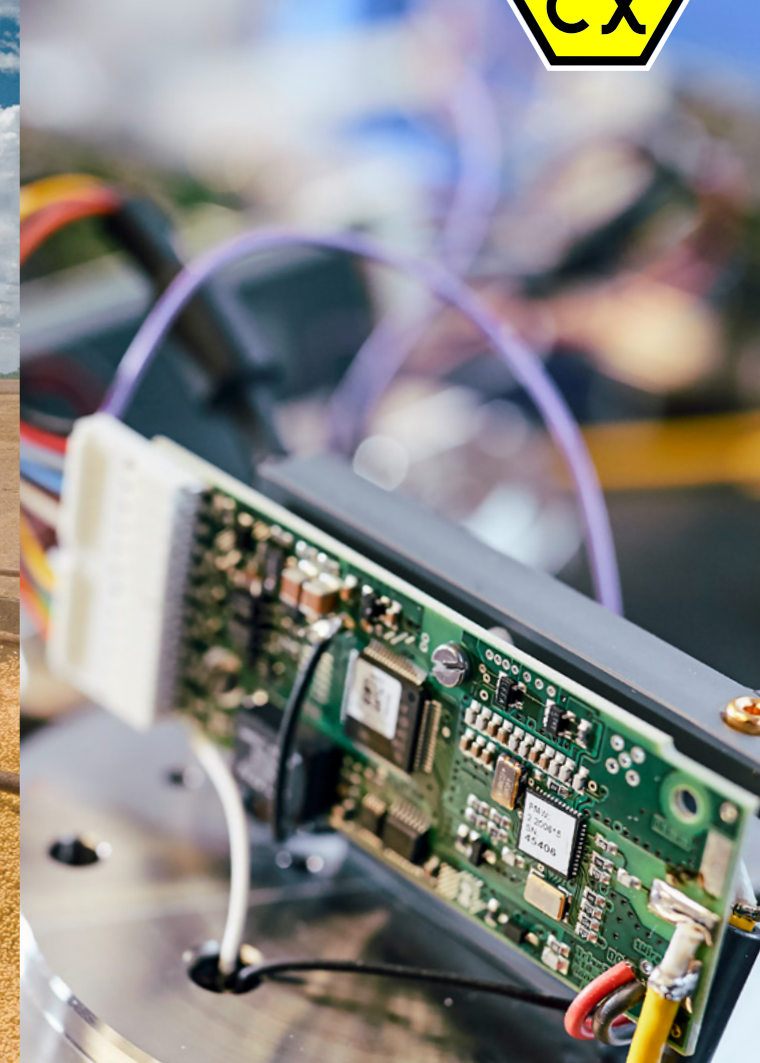

## Bulk Solids

„Moisture is the most important process parameter in drying and processing“

#worksustainably

## ATEX

„Type-tested sensors from a certified production facility“

#measuresafely
